

# WATER RESCUE STRETCHER BED

The Water Rescue Stretcher Bed is a rescuing device embedded with a power system. Users can launch the Stretcher Bed onto the water from the shore or vessel and control it to reach and rescue the drowning person quickly and safely by using the remote controller. The Stretcher Bed can be widely applied to emergency response for offshore platforms, resorts, luxury hotels, beaches, reservoirs, lake parks, river parks, recreational boats, urban waterways, Sport Event Venue.

# INTRODUCTION

- The Stretcher Bed can be put into the water by manual throwing or automatic launching.
- The operator remotely controls the Stretcher Bed to reach the drowning person, and the rescued person can grip the handles or buckle up the rescue belt to get rid of risks by lying on the Stretcher Bed.
- For those with poor self-rescue ability, the Stretcher Bed can move backward to scoop up the drowning person and bring them back to shore.
- The Stretcher Bed is able to heat up automatically, which is convenient for rescue in cold weather and can help the drowning person's body temperature recover.

**Save up to 4 Lives at a time  
with Zero Risk for Rescuers**

## HIGHLIGHTS

- + Ergonomic & Safety Design
- + Tangle-Free Propellers
- + Automatic Heating Device
- + High Visibility
- + Ease to Use & Deploy in Seconds
- + Powerful Motors & Strong Buoyancy
- + Small Volumn
- + Goods Transport
- + Low Battery Warning
- + High Speed

## FEATURES

	<b>Dimension</b> 1.68 × 0.73 × 0.26 m		<b>Max. Speed</b> > 4.7 m/s
	<b>Weight</b> 30 kg		<b>Heating temp.</b> ≥ 27.2°C
	<b>Endurance</b> > 60 min		<b>Control Range</b> 800 m

**200 kg** ≈   
 Floatability (Max)      3~4 × Adults
